# Syntillica Project Management Service

## Tying it All Together

Syntillica can save you time and money by maintaining your project online. Let your technical specialists focus on their real value-add activities and let Syntillica's project managers maintain the project using a state-of-the-art system.

## Internet-Based

Syntillica has implemented a custom-designed, internet-based project management server to enable expert consultants and clients from around the world to work together on projects, via any web-networked device using any operating system and available 24/7.

## Secure

The Syntillica Project Management Server is hosted on a Virtual Private Server using the secure https web protocol. Each user (consultants and client) are granted their own access credentials for each project separately at designated permission levels.

## Collaborative

Everything needed to collaborate on a successful project in one portal: Activity Reports, Work Packages, Gantt Charts, Budgets, Time-Tracking, Automated Notifications, News Feeds, Document Exchange, Meetings, Calendars, User Guides and more.
